Graduate Research Excellence Awards (GREAs) promote scholarly research publications of graduate students in peer-reviewed main-stream scientific journals and conference proceedings. To ensure a fair and transparent selection process, a selection criterion was developed and used to assess all applications by the GREA Selection Committee. Each application was assessed by each GREA Selection Committee member independently and the averaged score was used to rank the applications. It is my great pleasure to announce the winners of 2014 Graduate Research Excellence Awards:
