

List of Figures

Figure 1 - Picture of Ultragizmo Board	1
Figure 2 - Functional Diagram of Ultragizmo Board	2
Figure 3 - Ultragizmo Board Environment	3
Figure 4 - Location of Variables Inside a Microprocessor System.....	6
Figure 5 - The Maphome Window	7
Figure 6 - The CONPORT Window	8
Figure 7 - M68000 Assembly Language Program prog1.s	9
Figure 8 - The DEVPORT Window	9
Figure 9 - M68000 Assembly Language Program prog2.s (with Errors)	11
Figure 10 - Assembly Listing of (Correct) prog2.s.....	17
Figure 11 - Max+plusII CAD Flow.....	21
Figure 12 - The Max+plusII Window	22
Figure 13 - Max+plusII VHDL File Structure	23
Figure 14 - The Compiler Window.....	24
Figure 15 - The Timing Analyzer Window	25
Figure 16 - Waveform Editor Window	26
Figure 17 - Simulation Results.....	27
Figure 18 - Processor, DUART, and PC Interface.....	37
Figure 19 - LEGO Nose Diagram	44
Figure 20 - LEGO Sensor and Light Source.....	47
Figure 21 - 40-Pin Header View from Top.....	50
Figure 22 - 7-Segment Display Organization on the Ultragizmo Board	52
Figure 23 - Block Diagram of Fibonacci Counter	53
Figure 24 - VHDL Entity Organization for Fibonacci Counter	54
Figure 25 - VHDL Entity Organization for Watch	56
Figure 26 - Timing Diagram for a Read Operation on the M68000 Bus	62
Figure 27 - Diagram of SRAM and Controller Interconnections	63
Figure 28 - SRAM Read and Write Timing Diagrams	63
Figure 29 - Diagram of DRAM and Controller Interconnections.....	65
Figure 30 - DRAM Read and Write Timing Diagrams	65
Figure 31 - DRAM CAS-before-RAS Refresh	67
Figure 32 - DRAM Controller Block Diagram.....	68
Figure 33 - Block Diagram of M68000 Bus	69
Figure 34 - Timing Diagram for Bus Arbitration on the M68000 Bus.....	69
Figure 35 - Block Diagram of DMA Controller	73
Figure 36 - Block Diagram of Delay Circuit	75
Figure 37 - View of the Desktop.....	82
Figure 38 - Tera Term SSH Window	83
Figure 39 - CONPORT Window	83
Figure 40 - Send Text File Window in DEVPORT	84
Figure 41 - CONPORT Window after Successful Download	84
Figure 42 - Placement of Components on Ultragizmo Board.....	92
Figure 43 - Interrupt Control Register (ICR)	102
Figure 44 - Overview of Interrupt Control on the Ultragizmo Board.....	104

Figure 45 - Pin Connections for the Parallel Interface/Timer	111
Figure 46 - Port Logic for Parallel Interface/Timer	112
Figure 47 - Hex Display Segment Naming Convention	118
Figure 48 - CODEC Signal Connections	128
Figure 49 - CODEC Timing Diagram.....	129
Figure 50 - CODEC Serial-to-Parallel Converter	129
Figure 51 - Digital Protoboard	132
Figure 52 - Mouse Status Line Encoding.....	133
Figure 53 - Bouncing Status Line	134
Figure 54 - Hex Keypad Connections.....	135
Figure 55 - Diagram of the University of Toronto LEGO Controller Board.....	137
Figure 56 - Lights (and Motors) Can Be Connected in Parallel by Daisy Chaining the LEGO Cables	141
Figure 57 - Location of the Sensor and Axle Hole Used to Mount an Index Wheel.....	141
Figure 58 - One Possible Configuration for Using a Sensor to Count the Rotations of an Index Wheel	143
Figure 59 - An Example of Sensor Bounce	143
Figure 60 - Fundamental LEGO Dimensions Showing How a Beam Can Be Used to Reinforce a Stack.....	144
