This manual describes the current Ultragizmo microprocessor/FPGA system used in the undergraduate teaching labs in the Department of Electrical and Computer Engineering at the University of Toronto. These labs have been developed and evolved over the past 20 years by many people. Special mention should go to: Professor Zvonko Vranesic who conceived the lab and who was the motivating and guiding force of it for more than a decade, along with Professors Zaky and Hamacher. Peter Pereira designed and built the various versions of the boards and software and documentation, beginning with the Motorola 6800, through the 6809 to the 68000. David Lewis and Fred Aulich designed and built the current Ultragizmo system, which includes many new features including a 68306 integrated microprocessor and an Altera 10K70 FPGA. Fred also has put together many of the working pieces of the lab over these years and maintained them, including the M68000 board, the hex keypads, the DMA board, the voice/sound board, and the LEGO board. Along with Fred, Sunil Sebastian and Peter Pereira helped to develop the LEGO board. The clock chip configuration command is based on code provided by Marcus van Ierssel. The Ultragizmo monitor was developed by Paul Chow and Rob Jeschke at the University of Toronto under contract to the Canadian Microelectronics Corporation and is used with permission.

The following people in many different ways, also gave freely of their time to make the lab and its environs a better learning experience:

Robert McKay, David Lewis, David Galloway, Safwat Zaky, Carl Hamacher, Paul Chow, Keith Farkas, David Blythe, Peter Pereira, Fred Aulich, Sunil Sebastian, David Lewis, Corinna Lee, Jonathan Rose, Stephen Brown, Vaughn Betz, John Chappel, Marcus van Ierssel, Patrick Doyle, Glenn Gulak, Debatosh Debnath, Zvonko Vranesic

Apologies to anyone who was accidentally left off this list.

Version 1.0: Peter Pereira, Zvonko Vranesic, David Lewis

Version 2.0: Corinna Lee, Jonathan Rose

Version 2.1: Vaughn Betz, John Chappel, Corinna Lee

Version 2.2: Corinna Lee

Versions 3.0 and 3.1: Vincent Gaudet, Andy Ye, Fred Aulich, David Lewis

Version 3.2: Vincent Gaudet, Fred Aulich
